Schedule

EQUIPMENT:

Equipment and systems covered by this certificate are as follows:

Description of equipment :

The product is a new generation one-piece light fittings on the basis of absorbing advanced technology from abroad. The combination of the accessories (ballast and trigger) and the lighting, simplifying on-the-spot wiring, is easy for mounting and maintenance. The special design inside the lighting can ensure that the ballast dissipates heat immediately and prevent heat transmission from the light source to the ballast. Wireless connection between the light body and the outlet sleeve is adopted. It is great simplification of mounting that firstly install the outlet sleeve then screw the light body. When maintaining, can screw the outlet sleeve out, then screw it in after examination and repair. The light source including sodium light, metal halide light, etc. and several mounting style are at user's option with pipe wiring or cable wiring (only for hook style). Users should reliably ground the grounding screws inside and outside the enclosure of the lighting when using it.

Ratings:

Rated voltage: 220V~240V AC 50/60Hz

high pressure sodium lamp: 150W, 250W;

metal halide lamp: 150W, 175W, 250W;

high pressure mercury lamp: 175W, 250W.

CONDITIONS OF CERTIFICATION: YES as shown below:

1. Repair of the threaded joints must be made in compliance with the structural specifications provided by the manufacturer.
2. The entry shall be equipped with Ex certified cable glands with a compatible mode of protection for the intended use.
